Edynamic Softec Solution Pvt Ltd	Quality Analyst	Nov 2018 to July 2019
Vserv Business Solution (Intersoft Data Labs & Solution)	Sr Quality Analyst	July 2019 – till date

Project Walkthrough

Project Name(#1)	IOP(Institute of Physics)
Description	It is a comprehensive web-based system which handles the tracking, information, and reporting elements of the journal production process. It enables authors to track the production status of accepted articles, and journal editors to track the status, content, and page and color budgets of journal issues. It allows live information to be accessed by an external author or editor at any time, while offering in-house staff a full overview of the real-time status of all material in production. Includes automated issue make-up functionality and measures supplier turn-around time and also reduces the amount of time between the acceptance of an article and its publication.
Environment & Tool Used in Project	Java core, Manual Testing, Browser Stack, Broken Link Finder
Team Size & Duration	6
Role	QA
Responsibilities	<ul style="list-style-type: none"> ➤ Involved in Analyzing the User requirements. ➤ Involved in deriving the Test Scenarios and designing the manual test cases. ➤ Involved in generating the test data and preparing the weekly status reports. ➤ Involved in manual test execution and involved in various testing phases like Sanity, Functional, Retesting, System and Smoke Testing. ➤ Involved in defect review meetings with the Development team. ➤ Bug Tracking and replicating and Error Reporting (Using Bug Tracking tool JIRA) ➤ Client Interaction

Project Name(#2)	➤ STP (Season Ticket Portal)
Description	➤ STP is ticketing portal of various teams of NBA/NHL/NFL/AFL which provides specific websites for its registered clients to renew their league memberships. STP integrates Virtual Venue of stadiums & empowers teams to show client specific content as well.
Environment & Tool Used in Project	➤ Drupal 7/8 (Multisite)
Team Size & Duration	➤ 7
Role	QA
Responsibilities	<ul style="list-style-type: none"> ➤ Analyzed requirements to create accurate test case. ➤ Bug/Defect logging in Jira ➤ Preparation of daily status report and weekly status report. ➤ Database testing, API Testing, Regression Testing, Sanity Testing and functional testing of application.

Project Name(#3)	➤ Tranzact (Health Insurance Domain)
Description	The project entailed working on the functionality of Forms. The application had number of pages from where user could ask for queries regarding insurance policies and plans, About Health, medical policies, Products. This was US bases Health Insurance project. In this project site are moved to SiteCore CMS.
Environment & Tool Used in Project	➤ SiteCore, Pixel Perfect, Browser Stack,
Team Size & Duration	➤ 8
Role	QA
Responsibilities	<ul style="list-style-type: none"> ➤ Involved in Analyzing the User requirements. ➤ Involved in deriving the Test Scenarios and designing the manual test cases. ➤ Involved in generating the test data and preparing the weekly status reports. ➤ Involved in manual test execution and involved in various testing phases like Sanity, Functional, Retesting, System and Smoke Testing & Browser Compatibility Testing of the application. ➤ Bug logging including linking defect to test case, taking screenshots and preparing documents.

Project Name(#4)	➤ Himalaya (Health Care Products)
Description	<p>Himalaya is a health care products domain in which they are focusing their own E-commerce portal.</p> <p>We are providing the maintenance to Himalaya Products by SiteCore. We check the core functionality of the website. Development team implement the new functionality according the project requirement.</p>
Environment & Tool Used in Project	➤ SiteCore, Manual Testing, Pixel Perfect, Browser Stack, Regression Testing,
Team Size & Duration	➤ 7
